

# **Fictional Safety Guidelines — Falcon-1**

Synthetic training document for the DefenceOps AI portfolio project. This document contains fictional safety guidance and is not real-world military guidance.

## **1. General Safety**

Only trained and authorized users should handle the fictional Falcon-1 demonstration equipment. Read the applicable training documentation before use.

## **2. Electrical Safety**

Switch the equipment OFF before inspecting connectors or the battery module. Do not handle damaged cables or cracked electrical components. Keep liquids away from electrical parts.

## **3. Ventilation and Heat**

Operate the demonstration unit only in a dry, well-ventilated location. Keep cooling vents unobstructed. Allow the unit to cool before routine inspection.

## **4. Stop Conditions**

Stop the procedure if smoke, unusual odor, visible damage, battery leakage, or abnormal heating is observed. Do not continue troubleshooting an unsafe condition; refer the equipment to an authorized technician.

## **5. Documentation Boundary**

This document is synthetic and educational. It must not be interpreted as guidance for real military equipment, tactical activity, targeting, weapons, or operational decision-making.
